**RE: COLBERT LANDFILL UPPER AQUIFER VERIFICATION STUDY**

Dear Neil:

At the request of Ms. Sue McCarthy of your office, I am transmitting a figure showing ground water elevation contours for the Upper Sand/Gravel Aquifer based on data collected during the Upper Aquifer Verification Study. Also shown are proposed locations for initial Phase I South System monitoring wells. Supporting data will be provided in the October 1989 Project progress report. If you have any questions, please contact me.

Very truly yours,

LANDAU ASSOCIATES, INC.
